

# What are LUMINEERS<sup>®</sup> Porcelain Veneers?

LUMINEERS<sup>®</sup> BY CERINATE<sup>®</sup> are porcelain veneers that offer the painless way to a permanently whiter and perfectly aligned smile. Your LUMINEERS dentist can apply these contact lens-thin "smile shapers" to teeth without much grinding or shaving, transforming teeth into a naturally beautiful smile that looks perfect for every individual. LUMINEERS can even be placed over existing crown or bridgework without having to replace them.

LUMINEERS are contact lens-thin and are placed over existing teeth without having to remove painful tooth structure (unlike traditional veneers.) LUMINEERS is the painless, permanent cosmetic solution for stained, chipped, discolored or misaligned teeth.

## LUMINEERS BY CERINATE Technique

### Before

Teeth are stained, slightly misshapen with spaces in-between. An impression is made and the mold is sent to the Cerinate Smile Design Studios where only LUMINEERS are crafted.

## LUMINEERS VENEERS NO PAINFUL TOOTH PREPARATION

On next dental visit, the dentist tries in LUMINEERS to ensure a good fit. Teeth are moderately etched to prepare for placement but there is no removal of sensitive tooth structure, unlike the painful part of traditional veneer techniques. The LUMINEERS are bonded to natural teeth and set in place with a curing light.

### PAINFREE AFTER

In only 2 easy dental visits, your patient will have a permanently whiter and beautiful smile without shots, drilling, or pain.

## Contact-Lens-Thin to Save Your Tooth Structure

- No reduction of sensitive tooth structure
- No shots
- 2 easy dental visits
- Permanently whitens

**Lumineers are not recommended for patients with stained or darker teeth because the Lumineers are so thin, in order to mask the darkeness or the stains the Lumineers would have to be made “opaque” so they are not “see-through” As a result you lose the luminance of traditional veneers because they can be translucent and reflect the light and look very natural whereas the Lumineers would look chalky. Call for a free cosmetic consultation so that we can determine what is the correct solution for your teeth.**
